## Hermetically sealed, modular and customisable: the new GEZE MCRdrive system

**With the new GEZE MCRdrive sliding door system, GEZE presents a modular solution for all areas of a building which need to be sealed off hermetically from adjacent rooms. The sliding door system is classified in accordance with DIN EN 12207 and is sound insulated in accordance with DIN EN 4109. The all-in-one solution impressively combines premium technical quality with customisation options and discerning design.**

### **GEZE MCRdrive for rooms with special functions**

Stringent requirements concerning the entry of air-borne microbes apply to operating theatres and intensive care areas in hospitals, laboratories and cleanrooms in research institutions as well as in the food and chemical industries. Entrance areas, in particular, represent a critical point in these buildings. With the new GEZE MCRdrive sliding door system, the Leonberg-based systems provider is launching a solution that meets the highest of hygiene demands. GEZE MCRdrive complies with the specifications of the DIN 18650/EN 16005 standards for automatic door systems.

### **Customisable to customer needs**

The new GEZE MCRdrive sliding door system has a modular construction. Architects and planners can thus respond to the specific demands of the installation situation. With a maximum leaf weight of 200 kilograms, glass (ISO or Mono), HPL and stainless steel versions are available. The opening widths range from 800 to maximum 2,500 millimetres. The slim design of the special seal means that the new GEZE MCRdrive is visually almost indistinguishable from a conventional automatic sliding door. All the components are designed to prevent particles generating from the entire system and ensure easy cleaning.

## PRESS RELEASE

dated 13.01.2021

2 | 2

### Simple installation and operation

The new GEZE MCRdrive is compatible with all GEZE control systems and can thus be integrated in the central building control. The door can be opened via a floor sensor control unit, a push button or a movement detector or a transponder.
